

World River Day

25 September 2022

In 2005, the United Nations launched the Water for Life Decade to help create a greater awareness of the need to better care for our water resources. Following this, the establishment of World Rivers Day was in response to a proposal initiated by internationally renowned river advocate, Mark Angelo.

Rivers carry water and nutrients to areas all around the earth. They provide excellent habitat and food for many of Earth's organisms. It protects marine life and play role to maintain ecology system, so we concern about it "Save river to save mankind, to save life."
